

```
1 1. Docker Compose 실습 - Nginx 서버를 Docker Compose로 실행하기
2   1)docker run으로 nginx 실행하기
3     -Image : nginx:latest
4     -Listening Port : 80
5     -Host Connection Port : 8080
6     -index.html : <font size='7' color='red'>Hello Docker Compose</font>
7     -HTML Directory : /usr/share/nginx/html
8
9     $ docker run -it -p 8080:80 -v ${PWD}:/usr/share/nginx/html/ nginx
10
11  2)docker-compose.yml 생성하기
12     version: '3'
13
14     services:
15       nginx:
16         image: nginx
17         ports:
18           - 8080:80
19         volumes:
20           - ./:/usr/share/nginx/html/
21
22  3)실행하기
23     $ docker-compose up -d
24
25     -Web Browser로 확인할 것
26
27     $ docker-compose down
```
